

Corrigendum to the First Nations Food, Nutrition and Environment Study (FNFNES): Summary of key findings for eight Assembly of First Nations regions 2008-2018. November 2019.

Please note that the figure on page 9 of the summary of key findings report printed in November 2019 and available online for download prior to May 27, 2020, is incorrect. The correct bar graph is located within the full report and the newer online document. We apologize for any inconvenience caused.

Corrections to the bar graph titled “Percentage of households participating in any harvesting and production practices by ecozone” are as follows:

Boreal Cordillera:

Bar for the percentage of households that collected seafood should read **4%**, not 40%.

Bar for the percentage of households that collected plants should read **57%**, not 4%.

Taiga Plains:

Bar for the percentage of households that collected plants should read **62%**, not 6%.

Boreal Plains:

Bar for the percentage of households that collected seafood should read **2%**, not 1%.

Bar for the percentage of households that collected plants should read **24%**, not 14%.

Boreal Shield:

Bar for the percentage of households that collected seafood should read **1%**, not 13%.

The corrected figure is presented below:

Percentage of households participating in any harvesting and production practices by ecozone
